

a Red Hat community service

POSSSE

Remote Self Introduction

Hey there! In this part of the workshop we'll guide you through one of the most crucial pieces of community interaction: **remote contact** through a potentially **new medium**.

On this worksheet, we'll give you a quick overview of the **tools you might encounter**, as well as examples on where to find **more information**. Finally, we'll also tell you where to find us!

In this exercise, you'll be asked to create a contributor profile for a peer -- based solely on information gathered "remotely"...

Tools

IRC Help

try the following commands:

- /msg -- to message somebody
- /join -- to join a channel
- /whois -- to query info

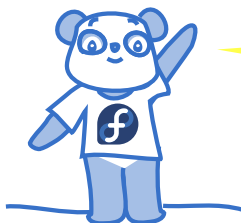

visit <link> for more information

Mediawiki Help

or some of these:

- [[pagename]] -- to link to a page on the wiki
- [http://foo.bar link] -- to link externally
 - * -- to create a bullet list
 - # -- to create a numbered list

visit <link> for more information

Alright, now let's have a look at some examples!

Meetbot Help

these are pretty self-explanatory, so we'll just give you the commands:

- #startmeeting
- #endmeeting
- #action
- #link
- #info
- #note
- #topic
- #agreed

visit <link> for more information

yup, that's us

Name

in the company

RHT role

in the community

Fedora role

Max Spevack	manager	finance
Robyn Bergeron	project mgmt	project mgmt
Sebastian Dziallas	intern & logistics	packager
Mel Chua	education	marketing & training

So how do our profile pages look like? Let's see!
