

Teaching Open Source is a community of practice.

The **Teaching Open Source** community provides a neutral point for collaboration between anyone with an interest in Open Source education. The **next generation** of software developers, computer scientists, system administrators, analysts, and build engineers need to understand Open Source and must be able to work efficiently within Open Source communities, and this community is on the forefront of this effort to **modernize computer science education**.

Join Us

Interested in teaching open source? The first step is to join the **TOS mailing list**, our main forum for discussion, and to introduce yourself. From there, we'll match you up with projects and people you might be interested in checking out.

Walking Tall

This rant talks about the city I live in. Feel free to move along.

I've blogged about a whole lot of subjects, though mostly Free Software related. I've blogged about my life before, but never about 'life in my city'.

I live in Monterrey, Nuevo

UTOS: Call for Operational Volunteers

Utah Open Source is preparing for the future. While we are not having a Utah Open Source Conference in 2011, we're getting ready to gear up for UTOSC 2012 along with a ton of community events throughout 2011. To do this, however, we need help.

WE NEED YOU

Come
